Medical Billing Service®

Improved Billing Operations

Managed Billing and Health Care Services

WEBeDoctor Billing Systems is a multi-specialty medical billing service dedicated to reducing your receivables. We work with you and your staff to insure HIPAA compliance, improve your billing operation, relieve office personnel of billing duties, and to obtain a fair and equitable return for service to patients.

HIPAA Compliance

With the imminent implementation of HIPAA, its security standards and focus on electronically transmitted data, now is the time to out source your billing operation to a professional billing service. Under HIPAA, data security is necessary for all transactions that involve medical data or information, with severe penalties for non-compliance. We utilize the latest technology, and have taken the required training to insure we, and our clients, are HIPAA compliant.

Our mission is to quickly obtain the full financial reimbursement for services provided to patients, while maintaining the highest levels of integrity, compliance, and ethics.

General Fee Schedule

Our pricing is designed to give individual consideration to each unique client. We strive to provide the best over-all service/cost to our customers. A standard billing contract includes the following and is priced at at a nominal percentage of recovered value:
- Insurance billing
- Follow-up for unpaid/denied claims
- A/R Management
- HCFA 1500 forms (New with NPI)
- Fully HIPAA and New NPI compliance
- Billing done to your schedule

- Post payments
- Resubmit rejected claims
- Patient Statements
- Electronic submission
- Standard Practice Reports
- Only current and valid ICD and CPT codes are used

Medical Billing Service®

Benefits

- Increased productivity - more claims processed using less office time; reduced paperwork in the office

- Processing to a schedule - claims are processed when you want them processed, eliminating backlogs and maximizing effort

- Improved accuracy - we are client centered, dedicated to providing clients with the finest billing, receivables management and collections

- Comprehensive Reports, monthly or in "real-time"

- Fixed cost for billing

- Improved, increased cash flow

- Real time Charge Capture at Point of Care (for providers with EMR option)

Optional Services include:

- Superbill form design

- *Real-Time access to records (for providers with EMR option)

- Appointment Scheduler (Web Based)

- Customized reports (Web Based)

- Database conversion

*Real-Time access to Patient Records:

An arrangement that allows for "on-demand" access to patient records, via the internet. This means any doctor or staff with controlled permission will have access to patient data from a computer in your office. You can review a patient's history before making a crucial decision, view notes or other information, or print a report on your office printer.
