WEBeBiller®
Solutions for Billing Services

No More of Tedius PaperWork!

Internet Based Medical Billing System for Billing Office

WEBeBiller© is designed to simplify the processing of medical insurance Claims for Medical Billers. It is the only Internet solution your business will ever need to generate and transmit claims to Medicare, Medicaid, and HMO/Commercial Insurance carriers. By utilizing the **WEBeBiller©** system in your office, you are accessing the most powerful and state of the art Internet solution for electronic Insurance claim submission. As a result, payments are processed and received in as little as five to ten days, as opposed to the six to twelve weeks normally associated with conventionally submitted paper claims.

WEBeBiller© intelligent electronic claims editing features help to ensure maximum claim acceptance by automatically checking each claim for omissions and Data-entry errors before it ever reaches the Insurance companies, **WEBeBiller©** is able to stay on top of payor-specific changes and industry trends, thereby guaranteeing the highest possible rate of acceptance of your claims, on the first try! In short, insurance carriers are far less likely to reject a claim created by the **WEBeBiller©** system than with any other method of Submission.

Collecting money that patients owe is a troubling problem for most Health care offices. 40% of open patient balances go uncollected for up to 120 days. WEBeBiller's powerful statement generating features directly address this problem. Because of this, **WEBeBiller©** has the ability to submit claims Electronically to Medicare, Medicaid, Blue Cross/Blue Shield, and Campus In virtually every state in the country, and to commercial carriers through the extensive payer network.

For every patient, creates a comprehensive, user-friendly Charge/payment/adjustment history record. This Patient Accounts Receivable Module replaces confusing patient ledgers with an easy-to-understand "open Item" system, displaying a patient's entire account history. Each Health care service is accounted for on an item-by-item basis and all of the charges, payments, adjustments, and insurance crossovers associated with the original service are clearly displayed for instantaneous access.
