

## Fully Integrated Web-Based EHR and Practice Management Software Solution for Pediatricians

With over 10 years, experience WEBeDoctor has collaborated with Pediatric experts, to connect Pediatricians with a practice management system. Integrating WEBePeds® in your pediatric practice allows more patients to be seen each day, reducing interrelated costs with managing a pediatric practice, and ensures patient privacy and safety. WEBePeds® by WEBeDoctor is the most efficient way to increase your profits, manage patient records and streamline your office workflow.

WEBePeds® Electronic Health Records (EHR/EMR) meets the ARRA Meaningful Use criteria. It is a Drummond Group® Certified Ambulatory EHR, ONC-ATBC Certified Complete EHR supporting "Meaningful Use" 2011-2012, and not to mention fully HIPAA Compliant. WEBePeds® Practice Management, EMR, ePrescribing, and Billing Software (ICD-10 compatible) is a fully integrated, single database software solution.

The pediatric templates were developed by Pediatricians for single and multi- physician offices, striving to not only give you the software to automate patient record documentation, but storage, retrieval, and the tools to make sure you optimize the technology for fast and complete return on investment (ROI).

### Pediatric Specific EHR Templates

- ▶ Point-n-Click SOAP Note Templates
- ▶ Growth Chart Templates
- ▶ Well Child Exam Templates
- ▶ Influenza Templates
- ▶ Allergy Templates
- ▶ Abdominal Pain Templates
- ▶ Chest Pain Templates
- ▶ Diabetes Exam/Follow Up Templates
- ▶ School Excuse Letters

 6/20/2011 - DTaP-IPV  
 Current Medications:  
 No Medication.  
 Well Checks:  
 Baby Boy WEBeDoctor is here today for a well child check.  
 Interval History: Unremarkable  
 Development: In regard to motor skills, caregivers note that Baby Boy WEBeDoctor is able to walk backwards, run stably, climb stairs with hand held, use a spoon, drink well from a cup, stack 3 to 4 blocks, scribble, sit in a small chair, use pull-toys, throw a ball, kick a ball and turn pages in a book. Social and language skills acquired include ability to use at least 10 words, suckler lips and hits, point to 1 or 2 body parts on request, follow simple commands and show functional understanding of objects. Generally sleeps 11 hours at night and naps 2 hours per day. Regarding potty training readiness, he has demonstrated dry naps and the use of word signals.  
 Nutrition: Baby Boy WEBeDoctor drinks approximately 16 ounces of whole milk per day. He typically eats 3 meals and 2 snacks. 12 teeth have erupted.  
 Caregivers Questions: Concerns include separation anxiety, thumb sucking, continued pacifier use and toilet training.  
 Social: Baby Boy WEBeDoctor's primary caregiver is his mother and father. Currently, mom is already back at work full-time. He is now in daycare full-time.

## WEBePeds® Benefits

### ► Maintain a Patient-Centered Practice:

Patient information is accessed instantly. Complete patient medical records can be viewed at a glance. WEBePeds® captures all patient related messages and records them to the appropriate medical record. Many professionals have found point-of-care charting improves overall documentation and compliance. WEBePeds® allows for more comprehensive documentation in less time.

### ► Facilitate Risk Management:

Illegible charts and prescriptions are a thing of the past! Patient charts are securely stored offsite. Since records are automated the risk of documentation audits are significantly reduced. Errors caused by illegible handwriting, unclear abbreviations, dose errors, unclear orders, or fax clarity are done away with. Compliance with HIPAA regulations is much easier to meet as well.

### ► Web-Based:

WEBePeds® web-based system allows for operational status and activity to be monitored without being physically in the communications center. A web-based system provides for remote access to live information without

sacrificing security. Multiple users can be on the system at the same time. Mobile devices such as mobile phones, iPad®, netbook, laptops as well as desktops can access the system at the same time.

### ► Security:

WEBePeds® uses the highest security available, 128bit encryption, the same encryption used for online banking. Information can be restricted at the user level; logging actions without sacrificing data or security integrity.

### ► Revenue Cycle Management:

WEBePeds® has complete revenue cycle management. WEBePeds® allows to determine insurance eligibility and the patient's insurance coverage. This allows for the pediatric provider to reduce denials and increase reimbursement by providing medically necessary services. This improves the workflow process and allows the staff to accurately authorize services, validate coverage, and get copayments prior to the patient's appointment.

In addition, WEBePeds® allows for a streamlined billing and electronic claims processing. WEBePeds® provides analysis and reporting capabilities so pediatric professionals can

better manage insurance payers as well as individual cash patient accounts.

### ► Improve Time Consuming Office Processes:

Searching for lost charts is time consuming and your staff could be more efficient. WEBePeds® eliminates time lost searching for misplaced charts because documentation is written at the point of care and organized electronically right away. Charts, filing and folders are all eliminated -there is nothing to misplace or lose! Patient information can be shared among your staff to complete multiple tasks at once.

### ► Cost:

Since WEBePeds® is web based; the cost for a complete solution is less expensive than traditional client/server based software. There is no need for expensive servers or data rooms. Multiple devices can be used with WEBePeds® including Apple iPad®, mobile phones, netbooks, notebooks, and even desktop computers, saving your company capital to invest elsewhere. Additional costs for updates and users are a thing of the past. All updates and additional users are included in the cost.

## Hardware and Software

### Requirements

#### Workstations:

- Apple or PC
- Pentium 4 class or Better
- 2GM RAM or Higher
- 800x600 screen resolutions or Better
- Windows XP Professional or Higher

#### Broadband Internet Connection:

- DSL or Better

#### Internet Browser:

- Microsoft explorer 7 or Higher
- Mozilla Firefox, Safari, or Google Chrome

#### Software:

- Adobe Acrobat Reader 7 or Higher
- Microsoft Word 2003 or Higher
- Microsoft Excel 2003 or Higher

### Recommendations

#### Tablet PCs:

- Apple iPad (Version 1 or 2) or Better
- Dell Inspiron Duo or Better
- HP Touchpad or Better

#### Pen Tablets:

- HP Compaq TC4400 or Better
- Toshiba Portege M750 or Better
- Dell Latitude XT2 or Better

#### Line Printers:

Windows compliant Laser Printer

#### Label Printers:

- Dymo LabelWriter 450 Turbo or Better
- \*Avoid all-in-one machines (print/fax/scan)
- \*Avoid Dot Matrix printers

#### Full Sheet Scanners:

- TWAIN-compliant full-sheet scanner
- Fujitsu ScanSnap S1500/S1500M or Better

#### Card Scanner for ID/Insurance Cards:

- Simplex, Model PS665-SS or Better

#### Signature Pad:

- ePad by Interlink electronics VP9801 or Better
- Wacom Sign Pad STU-300 and Sign Doc or Better

#### Software:

- Dragon Medical 10.1 Dictation Software or Better
- Sign Doc for Pen Tablet by Softpro

## WEBePeds® Features

- Drummond® 2011 certified system
- ARRA approval for "Meaningful Use"
- Workflow Management
- Immunization Records and Inventory Tracking
- Electronic Growth Charts
- Pediatric Dosage Calculator
- ASP Based
- E&M Coding Assistance for Pediatrics
- Electronic Prescription Writing
- Lab Interface (Quest, LabCorp, etc.)
- Decision Support
- Document/Image Management
- Drug Database with Drug Interaction Alerts
- Health Maintenance Reminders
- Online Patient Portal
- Pediatric Specific Education
- CHDP Forms (California)
