

WEBeMobile®

A Complete Mobile Workflow
Solution for Healthcare Providers

With over 10 years, experience WEBeDoctor® has designed an interface that allows the use of the Apple® iPad® to connect healthcare professionals with a mobile healthcare management solution. Integrating WEBeMobile® in your practice allows more patients to be seen each day, reduces interrelated costs with managing a practice, and ensures patient privacy and safety, while taking advantage of the seamless integration of WEBeDoctor with your Apple® iPad® through ease of use, portability, and a large screen. WEBeMobile® is the most efficient way to increase your profits, manage patient records, e-prescribe medications, and streamline your office workflow.

WEBeMobile® is a Complete Workflow Solution including for your healthcare practice. It is a Web Based System available through Remote Wireless Access including: Appointments, insurance verification, scheduling, Patient Electronic Medical/Health Records (EMR/EHR), electronic prescriptions, manage lab work, reporting, digital images, dictation, transcription, referrals, revenue cycle management, and electronic billing. It is HIPAA compliant and designed to save office staff time, keep expenses down, and provide the healthcare provider with better tools to manage the practice and increase patient care.

WEBeMobile® facilitates the use of the Apple® iPad® at your practice. WEBeMobile® can work with your existing desktop, laptop, and other devices while staff is using WEBeDoctor at the same time. Few products have been designed to be used cohesively with the iPad® together in one system. The WEBeMobile® allows healthcare providers to access schedules, access entire patient charts, electronic prescriptions, and generate revenue cycle management reports from the office, hospital, or even on vacation!

- Remote Wireless Access
- WEBeMobile® gives healthcare providers Access Anywhere Anytime!
- WEBeMobile® is an Affordable solution
- Practice information is backed up regardless of where you use your WEBeMobile

► **Reduce Office Expenses:** WEBeMobile® allows healthcare professionals to see more patients, to reallocate staff where needed, and implement an improved work flow through ease of charting, elimination of transcription costs, customized reporting, maximization of medical coding, and immediate billing and claims processing all at your fingertips with the iPad®. Charts, files, folders, and labels are all eliminated, and no longer need to be purchased.

► **Facilitate Risk Management:** Illegible charts and prescriptions are a thing of the past! Patient charts are securely stored offsite. Records are automated so the risk of documentation audits are significantly reduced. Errors caused by illegible handwriting, unclear abbreviations, dose errors, unclear orders, or fax clarity are done away with. Compliance with HIPAA regulations is much easier to meet as well.

► **Maintain a Patient-Centered Practice:** Patient information is accessed instantly and at your fingertips. Complete patient medical records can be viewed at a glance. WEBeMobile® captures all patient related messages and records them to the appropriate medical record. Point-of-care charting can be done on the iPad®, improving overall documentation and compliance of the healthcare provider. WEBeMobile® allows for more comprehensive documentation in less time.

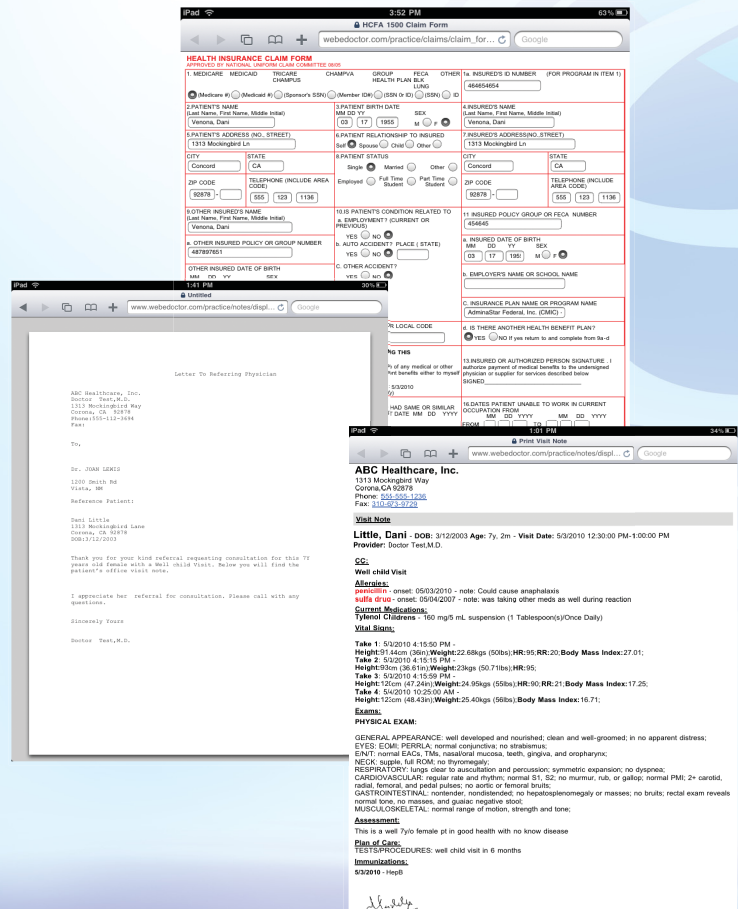

WEBeMobile® uses the SureScript network allowing healthcare providers to send electronic prescriptions to over 10,000 pharmacies nationwide. WEBeMobile® prescription writing is efficient and complete allowing healthcare providers to view interactions and contraindications with automatic drug to drug and drug to allergy checking.

Control Number	Patient Chart ID	Physician Name	NPI

► **Improve Time Consuming Office Processes:** Searching for lost charts is time consuming and your staff could be more efficient. WEBeMobile® eliminates time lost searching for misplaced charts because documentation is written at the point of care and organized electronically right away. Charts, filing and folders are all eliminated — there is nothing to misplace or lose! Patient information can be shared among your staff and cohesively work in real time with your desktop, laptop, iPad®, netbook, and other devices to complete multiple tasks at once. WEBeMobile® does secure backups saving time and protecting your patient and practice data.

► **Revenue Cycle Management:** WEBeMobile® has complete revenue cycle management. WEBeMobile gives healthcare professionals the ability to determine insurance eligibility and the patient insurance coverage at your fingertips. This allows the healthcare provider to reduce denials and increase reimbursement by providing medically necessary services. Staff is able to accurately authorize services, validate coverage, and get copayments prior to the patient's appointment. In addition, WEBeMobile® allows for streamlined billing and electronic claims processing in the office, at home, or on vacation. WEBeMobile® provides analysis and reporting capabilities so healthcare professionals can better manage insurance payers as well as individual cash patient accounts.
